

## Help your residents save energy

The Consumers Energy Multifamily Program offers FREE installation of energy-saving products for your residents. Installation only takes a few minutes and the products may include:

### 4 FT LED Linear Light Bulbs

- Use 40% less energy and last 5 times longer than incandescent bulbs
- Lighting accounts for around 15% of an average home's electricity use<sup>1</sup>

### Water Saving Aerators and Showerheads

- Can save properties over 5,000 gallons of water per year compared to traditional faucets and showerheads
- Lowers annual natural gas and water/sewer costs

### Pipe Wrap

- Reduces heat loss and can raise water temperature 2–4°F compared to uninsulated pipes, allowing you to lower your water temperature settings<sup>1</sup>
- Can reduce an apartment's energy use each year; more for every foot that is insulated

### Window Kits

- Simple, five-step installation
- Drastically reduces drafts, which saves energy and money while keeping residents comfortable

### Nest Thermostats

- Can save 10–12% on heating and 15% on cooling<sup>2</sup>
- Average estimated savings of \$131 to \$145 a year<sup>3</sup>
- Available to income qualified properties only

### Door Sweeps and Door Weatherstripping

- 30–40% of a home's overall heating and cooling loss can be attributed to improperly sealed and weatherized homes<sup>3</sup>
- Available to properties that meet specific qualifications

<sup>3</sup> Based on typical energy costs

Qualifying properties must contain three or more units under one roof. Energy-saving products installed are dependent upon Consumers Energy account type and eligibility. Actual products installed may differ from the images shown. Measures are determined based on the environment, overall efficiency and product availability. Products installed depend on the utility eligibility and existing baseline. LEDs will be installed only in fixture containing incandescent or halogen lamps. ©2024 Consumers Energy, Inc.
